STRUCTURE

● Recommended ● Suitable ● Not recommended

CHARACTERISTICS	ADVANTAGES
Microground Printing Surface	Specially formulated, image visible red surface. EPDM polymer responsible for high resistance to swelling against non-aggressive UV drying inks and cleaning agents. Ghosting/embossing from previous jobs is eliminated. Not recommended for use with daylight fluorescent inks and metal-pigmented inks.
Dimensionally stable compressible carcass	Its unique compressible design reduces surface smashes and markings created by rigid substrates such as; metals, plastics and boards. Almost no sinking or stretching giving the blanket exceptional dimensional stability. After mounting no need for further re-tensioning thus leading to reduced down time.
