MAGNITEK™ Y-120 WM WASH

BLANKET & ROLLER WASH

DESCRIPTION

MagniTek™Y-120 WM is a premium water miscible blanket and roller wash. Y-120 WM's unique blend of cleaners, solvents and rejuvenators thoroughly removes ink, gum deposits and paper lint.

When activated with 10 - 50% water, a deep cleaning solvent water emulsion is created which effectively cleans both solvent soluble (ink, varnish, dryers, pigment) and water soluble (paper, anti-offset powder, gum) contaminants from rollers and blankets.

The addition of water provides many added benefits - it reduces VOC consumption and is more economical because less product is used. This product is user-friendly - it reduces vapors and odors, and is non-irritating to hands.
