Control parameters
Components with occupational exposure limits:

Ingredient name	Occupational exposure limits
9005-28 Starch	PEL Long-term value: 15mg/m³ total dust – 5mg/m³ inhalable dust REL Long-term value: 10mg/m³ total dust – 5mg/m³ inhalable dust

Exposure controls
Personal protective measures:
Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work.
Breathing equipment:
If the exposure limit is exceeded, a particulate filter respiratory (NIOSH type N95) may be worn.
Protection of hands:
The glove material has to be impermeable and resistant to the product/the substance/the preparation.
Due to missing tests no recommendation to the glove material can be given for the product/the preparation/the chemical mixture.
Select glove material based on penetration times, rates or diffusion and degradation.
Material of gloves:
The selection of suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.
Penetration time of glove material:
The exact break-through time has to be determined and observed by the manufacturer of the protective gloves.
